Japanese government's support

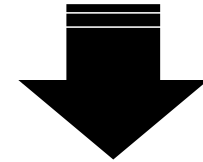

Fukuoka method in Ethiopia (2018~)

- Addis Ababa
- Bahir Dar

Human Resource Development

- “Sweep the trouble under the rug.”
- Develop Human Resource to improve waste management in Africa, based on Japanese experience

“Terakoya” system

- Private educational institutions that taught writing and reading to the children of Japanese commoners during the Edo period

Action from Region

- Mutual learning in region is important to establish and expand proper waste management

Study tour to Japan

- Japan's scope of waste management expands
 - ✓ Hygiene problems
 - ✓ Shortage of landfill site
 - ✓ Dioxins and PCBs
 - ✓ Illegal dumping
 - ✓ Transboundary movement
 - ✓ Climate Change

Mainstreaming of Waste Management

- Prioritize the waste management in the country
- Ownership is essential to proceed the waste management policy

Thank you for your attention
